

From Missed Acuity to Maximum Accuracy: PDPM Reporting with an Impact

Prove—and improve—the value of psychiatry under PDPM

Why It Matters Now

The spread of PDPM across state Medicaid programs has changed the reimbursement equation. Therapy no longer drives case-mix through volume. Instead, documented clinical complexity — particularly Nursing, but also NTA and Speech Therapy — dictates daily rates. Many facilities are experiencing CMI reductions and revenue decline. Yet this isn't because residents are less acute; it's because acuity isn't being consistently proven in the record. Without therapy to carry the weight, facilities must rely on ancillary partnerships that help capture the full picture of resident complexity — and reclaim the accuracy of Medicaid PDPM reimbursement, along with skilled PDPM reimbursement.

PDPM Summary Report

Accolade Healthcare of Paxton Senior Living – SNF

Total PDPM Scores Processed	154
Total Nursing ICD10 Codes Counted	123

Top 4 Nursing CMGs

What This Report Does

The DocNow PDPM Reporting System analyzes your psychiatry documentation and shows, in plain English and clear visuals, how it drives accurate PDPM classification—and where opportunities could be missed. This report focuses on both skilled PDPM clinical indicators and long term care Medicaid PDPM reimbursement as well.

Key Highlights:

- **Nursing & NTA Precision:** Identifies the clinical indicators provided by physiatry that most often drive Medicaid PDPM reimbursement
- **Speech Therapy Insights:** Flags speech/swallow diagnoses supported by physiatry documentation that affect SLP rates.
- **Missed Opportunity Finder:** Detects where documentation suggests higher CMGs that weren't captured on the MDS.
- **Impact Dashboard:** Breaks down the "Top 10% drivers" that deliver the biggest financial results.
- **Leadership-Ready Reporting:** Executive dashboards built for boardrooms, payer conversations, and strategic planning.

The Results You Can Expect

- Reimbursement that reflects true resident acuity.
- Greater clarity into which clinical factors matter most.
- Scalable insights across facilities to replicate what's working.
- Physiatry engagement that strengthens the connection between documentation and reimbursement accuracy.

Get Started Today

Don't let missed documentation keep you from the reimbursement you deserve.

Pilot the PDPM Reporting System across 3 facilities for 90 days. We'll deliver a baseline report, monthly dashboards, and an executive read-out with clear next actions to protect your PDPM Medicaid revenue—without adding to your team's workload.

Let the data show you the tremendous impact that physiatry services can have on boosting the accuracy of skilled PDPM and Medicaid PDPM reimbursement.
